WORK EXPERIENCE

Educational Game Developer

June 2023 – Present

Creatubbles

- Developed gameplay code in **Lua** and improved internal library APIs to streamline developer experience.
- Served as **project owner** of *SuperCode Saga*, a series of learn-to-code educational games for kids. Translated learning goals into curriculum progressions, product features, and design briefs. Coordinated and prioritized implementation tasks and oversaw product cohesion.
- Worked directly with users while leading online *SuperCode* coding classes. Gathered user feedback and translated insights into product and UX improvements.
- Operated with high autonomy and navigated ambiguity in a fast-paced **start-up environment**.

Gameplay Programmer

Jun 2020 – May 2023

Behaviour Interactive

- Architected data-driven systems on the Jurassic World: Primal Ops mobile game, working across the full stack. Developed feature logic and player-data handling on the **Javascript** backend and created REST API endpoints with **Node / Express**. Built major UI flows in the **C# / Unity** frontend, such as the world map, mission selection, and character selection screens.
- Developed multiplayer features on an unannounced PC/console project with **C++ / Unreal Engine 5**, ensuring performant client-server data synchronization.
- Collaborated closely with designers to build tools and functionality that suit their needs and vision while maintaining adherence to technical requirements.

Graduate Researcher, Human-Computer Interaction

Sep 2018 – May 2020

University of Toronto

- Designed and built interactive prototypes with mobile (**Swift / iOS**) and web (**Javascript / React**) technologies.
- Designed and executed usability testing studies. Analyzed and synthesized findings into research writing.
- Fulfilled teaching assistant duties for intro to CS and HCI courses.

Software Developer Intern, Sketchbook

May 2017 – Aug 2017

Autodesk

- Prototyped new 2D drawing and animation features in the Autodesk Sketchbook Motion app, building front-end functionality in **iOS** and interfacing with the animation engine built in **C++**.

Software Developer Intern – Canadian Imperial Bank of Commerce

Jan 2017 – Apr 2017

Research Intern – University of Toronto

May 2016 – Aug 2016

EDUCATION

Master of Science, Computer Science (Human-Computer Interaction)

Sep 2018 – Jan 2020

University of Toronto

- Published first-author thesis paper at a top-tier HCI conference, *UIST 2021: "Space, Time, and Choice: A Universal Approach to Flexible Personal Scheduling."*

Bachelor of Engineering, Software Engineering

Sep 2013 – Apr 2018

McMaster University

SKILLS

Programming Languages: Lua, Javascript, C#, C++, Swift, HTML5, CSS3

Frameworks/Tools: Unity Engine, Unreal Engine, React, Node.js, Mocha.js, Express.js, HTML5 Canvas, Git, Perforce

Design Skills/Tools: Figma, Adobe Photoshop, Adobe Illustrator, UX Design, UX Research, Instructional Design
